

DentalManager Inbox™

Improved service and reduced handling cost

With DentalManager Inbox™ 3Shape ease the communication and order flow between dental lab and manufacturer, making the process highly efficient and productive

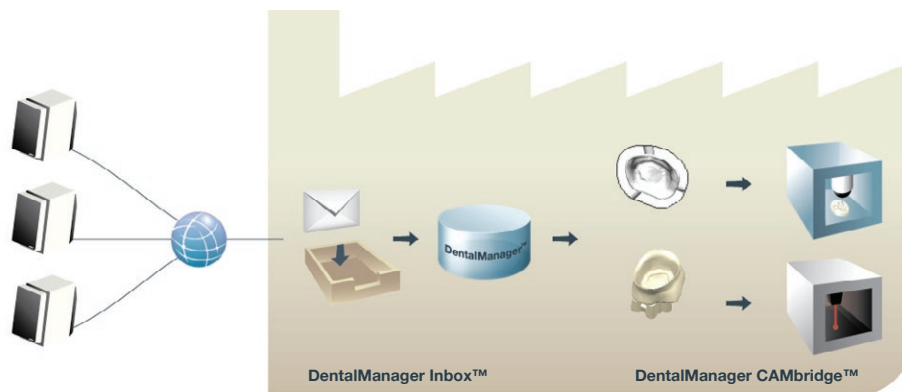

DentalManager Inbox™ is 3Shape's solution for remote order management. DentalManager Inbox™ fully integrates with 3Shape Dental System™ allowing complete orders to be transferred safely across networks.

The order management system consists of an easy-to-use interface, where users, with the click of a button, can seamlessly transfer orders from the dentist's office to the lab and from the lab to the manufacturer.

Users can monitor the status of their orders in real time, and **manufacturers can effectively**

communicate with their customers. Finally, the DentalManager Inbox™ automatically creates estimated shipping and delivery dates based on the material ordered and the manufacturing process involved.

The Inbox smoothly handles several hundred labs connected to one manufacturer and optimizes the administration and handling of orders. In short, the DentalManager Inbox™ is an essential part of DentalManager's completely integrated order management system, which works to **provide transparency throughout the entire production process.**

Fully automated manufacturing - with *DentalManager Inbox™* and *DentalManager CAMbridge™*.

HIGHLIGHTS

- **Easy network setup** - only requirement is a functional FTP server
- **User-friendly** - configurable automatic or one-button manual order transfer
- **Track & Trace** - customers know where their orders are, the status and progress, all real-time
- **Scalability** - flexible for businesses of any size
