

Software Test Engineer

We know that testing software is as important as developing it. We are looking for outstanding test engineer who knows how to test complex systems and more importantly loves to do that. As a key member of the team you will primarily test software for 3Shape's CAD applications in our Kiev office.

3Shape develops and markets integrated 3D solutions (3D scanners and 3D software) for industrial and healthcare applications, such as hearing aid production where 3Shape has a global leading position. We are an international company with headquarters in Denmark, development in Kiev, Ukraine and manufacturing in Poland. 3Shape have customers in more than 40 countries around the world including the US. For more information, visit www.3shape.com.

Your profile:

You are a talented test engineer who has experience and drive testing complex modern systems.

You should have experience in several of the following fields:

- Experience testing commercial software projects
- Knowledge of modern ways of testing software including scripting
- Engineering degree

We also want you to be:

- Analytical and well organized
- Fluent in English verbally and in writing
- Interested in taking a challenging position in the team of dedicated professionals

We offer:

- Higher-than-average salaries (White)
- Good growth opportunities
- Paid vacations and social package

3Shape going Global

3Shape is headquartered in Copenhagen, with development teams in Denmark as well as the Ukraine and own production site in Poland. In early 2009 we opened Sales and Support Offices in New Jersey, USA and Shanghai, China.

Our People

Employing and developing the right people is an important key to 3Shape's success. We want to be the **best within our business**, an ambition which has created a true **fighting spirit** throughout the company - with lots of **commitment** and courage, and a **professional attitude** towards business.
