## 3Shape TRIOS now with STL file export

*Creates completely open ecosystem across all 3Shape solutions*

**Copenhagen, June 9, 2017** – With upcoming software update, 3Shape TRIOS intraoral scanner users can now export STL file digital impressions directly from their TRIOS Dental Desktop software dashboard. This enables TRIOS owners to use STL files for working with in-house software and for sending to dental laboratories and appliance-makers.

3Shape is spearheading more openness in digital dentistry. By driving integrations with the widest selection of restorative labs, implant manufacturers, orthodontic treatment providers, milling systems and 3D printer-makers, practice management systems, 3Shape provides an open ecosystem for dental professionals.

3Shape presently provides STL CAD design file export from its design software. Open STL CAD design file export means professionals can manufacture their designs on any mill and 3D printer. With the addition of TRIOS STL intraoral scan export, both 3Shape digital impressions and CAD design files are now completely open and available for any dental professional on any system.

“As doctors and the industry in general, go more and more digital, the need for across-the-board seamless connectivity is essential. We believe that professionals should have the freedom to choose the partner and solution they want to work with. Whether it’s a dental lab or appliance-maker that needs a STL or DCM file for their workflow, or a preferred milling machine and 3D printer, it should be up to the professionals to decide how, and who they work with,” says Tais Clausen, 3Shape co-founder and co-CEO.

The TRIOS STL export-option will be included as a software upgrade for TRIOS users in the release of the new 3Shape Dental Desktop platform for TRIOS. Roll out is expected to start Q4 2017. For specific availability, TRIOS users should contact their reseller.

### **About 3Shape**

3Shape is changing dentistry together with dental professionals across the world by developing innovations that provide superior dental care for patients. Our portfolio of 3D scanners and CAD/CAM software solutions for the dental industry includes the multiple award-winning 3Shape TRIOS intraoral scanner, the game-changing 3Shape X1 4-in-1 CBCT scanner, and market-leading scanning and design software solutions for dental labs. Two graduate students founded 3Shape in the year 2000, and today the company’s fast-growing team of employees in 19 offices worldwide is serving customers in over 100 countries. 3Shape’s products and innovations continue to challenge traditional methods, enabling dental professionals to treat more people more effectively.
