

3Shape Clear Aligner Studio

Hardware Partners 2021

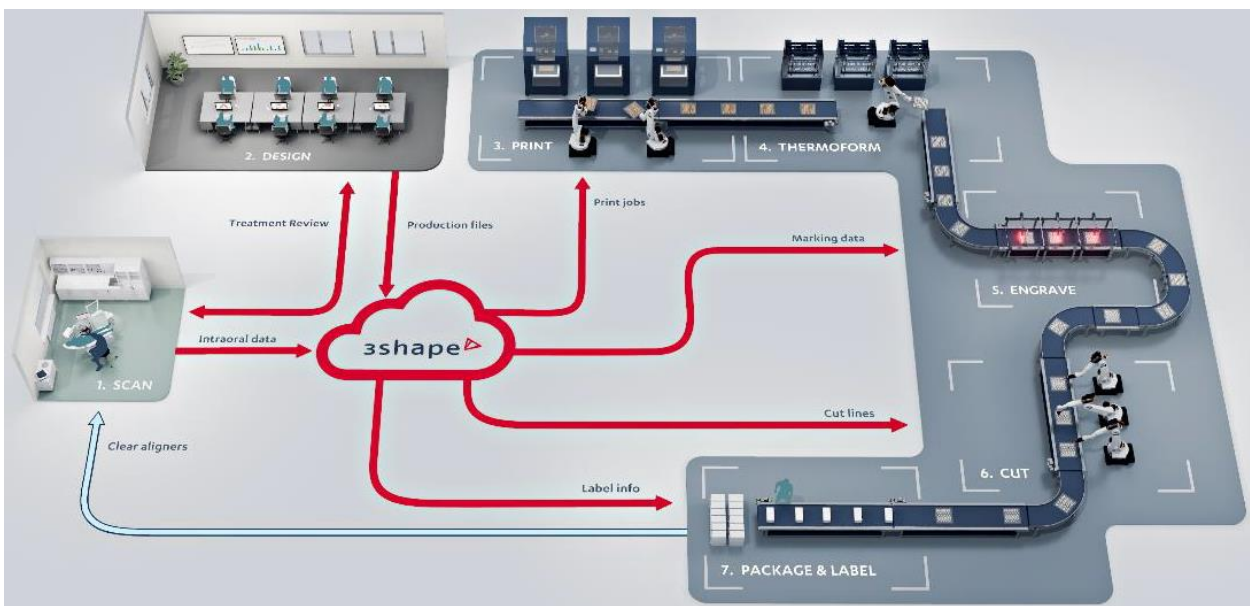

Hardware Partners

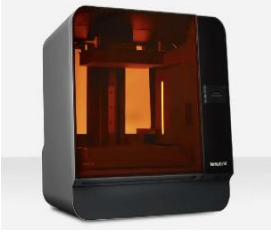

The 3Shape Clear Aligner Studio solution is an all-in-one Digital Platform that will enable you to create a flexible and digital Clear Aligner workflow. You can adapt and scale the platform as your business targets develop over time.

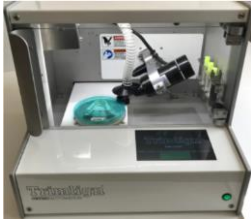

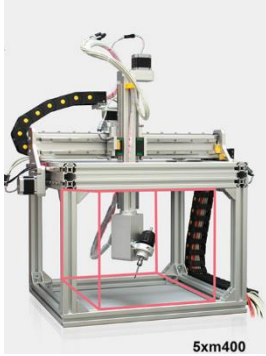

We are offering this solution in partnership with Hardware Partners, who provide equipment for printing, marking and cutting the Clear Aligners. Below is a list of our Hardware Partners and contact persons, should you need to discuss more details with them.

The validation process offers a fully trusted connection for the users. The validation concept and a full overview of supported machines and its connection to different 3Shape Studio app can be seen in this picture below.
