3Shape opens doors to France's dental community

Copenhagen and Paris, May 25, 2018 – 3Shape, the leading 3D scanner and CAD/CAM global software provider, opened the doors to its new office in Paris, France yesterday.

The opening day event was attended by leading French dental professionals as well as Denmark's Ambassador to France, Ms. Kirsten Malling Biering. 3Shape company headquarters are in Denmark.

The new France office will enable dental practices, labs, resellers and partners to take part in local language 3Shape training and demos at the facility.

Located in Paris West, the office is fully equipped with the company's latest digital dentistry solutions. The facility includes a simulated dental practice with 3D scanners and printers. Dental professionals, 3Shape partners and resellers, can all demo and train restorative and orthodontic workflows as well as attend classes given by the 3Shape French Academy, also located in the new office.

In France, 3Shape is considered the most preferred CAD/CAM solution by dental labs. Its 3Shape TRIOS intraoral scanner used by doctors, is the most recognized digital impression solution in the world*.

"France's dental professionals have been quick to adapt to digital technology. I believe that they recognize the predictability and opportunity the digital workflow brings to their patient care," says 3Shape France SAS General Manager, Morten Trouplin Nørholm. He adds, "Like our open dentistry solutions, our Paris office is always open to French dental professionals. We are looking forward to it becoming a valuable resource for the community to learn, grow, and together, change dentistry. "
