3Shape Expands Treatment Opportunities for Dental Practices with TRIOS-meets-Prime and 3Shape Automate

3Shape to showcase new partnerships, integrations, and chairside options at Chicago Midwinter 2024

Copenhagen, February 22, 2024- 3Shape is excited to unveil new game-changing digital dentistry solutions at Chicago Midwinter, February 22-24, 2024. 3Shape will showcase its latest solutions for dental practices, including the award-winning TRIOS 5 intraoral scanner, 3Shape Unite platform, and value-bringing integrations.

1) TRIOS meets Prime integrations are now available for dental practices

As previously announced, 3Shape and Dentsply Sirona are expanding their workflow integrations to enable dental professionals through DS Core and 3Shape Unite to establish design and manufacturing protocols directly in their practice. Beta-testing has been completed successfully with excellent feedback, and the integrations are now officially available for end-users in the main markets.*

Innovative in-office Primemill and Primeprint solutions for 3Shape TRIOS users via DS Core

Dentists can seamlessly connect TRIOS scanners to Primemill and Primeprint for in-office milling and printing via 3Shape Unite, DS Core, and the inLab CAD software. Thus, high-quality prosthetic restorations such as permanent esthetic crowns, as well as removable and temporary dental applications such as splints, temporary crowns, or models, can be manufactured directly in the dental practice on the same day.

2) 3Shape Automate, the AI-powered design service, is now available for TRIOS users in 3Shape Unite

3Shape's Automate Design Service for crowns and nightguards is now available as apps in the 3Shape Unite store, making it available for users of 3Shape TRIOS that have or are considering chairside capabilities.* 3Shape Automate is a dental design service platform powered by AI technology. Users upload their scans, and Automate uses AI to create and return designs of anterior and posterior crowns or nightguards within minutes. Dentists now get a seamless and fast end-to-end workflow by scanning with TRIOS, designing through Automate, and manufacturing through 3Shape Produce – with all steps handled directly from the Unite platform. In 2023, 3Shape Automate rounded over two million crown designs, signifying its usefulness for dental professionals.

3) The 3Shape Unite Store continues to grow - now with thousands of apps and integrations

The Unite Store is growing every day and lets dentists effortlessly expand their work with thousands of useful apps. There are 150+ world-class partners for clear aligners, 3D printing and milling, patient management, imaging systems, sleep apnea, design services, and more. Plus, there are over 8,000 3Shape labs to work with. New apps are being added to the 3Shape Unite Store every week. Learn more about 3Shape Unite: <https://www.3shape.com/en/software/unite>

3Shape is at the Midwinter show, McCormick Place Chicago, Booth # 1215, and at LMT Lab Day, Hyatt Regency Chicago, Booth # J-16, K-17. During the Chicago events, dental lab technicians and practitioners are encouraged to come by the 3Shape booths to review, discuss, and demo the latest 3Shape solutions, including the latest Dental System lab software. 3Shape will also deliver free lectures and training at LMT Lab Day. Attendees should register in advance for sessions.
