Gettin' diggy with 3Shape at Chicago Mid-Winter

Copenhagen, February 18, 2016 – 3Shape will present its latest digital dentistry solutions, like TRIOS® 3 and the D2000 lab scanner, at the Midwinter Meeting in Chicago, February 25 - 27, 2016. 3Shape will also deliver an industry-focused lecture program and product training at the show.

3Shape TRIOS 3 - #1 in accuracy

The TRIOS 3 digital color impression solution was recently named the industry's most accurate intraoral scanner in a study released by the American Dental Association. 3Shape will present TRIOS 3, which has been updated with new features and functionality at the show. Visitors will be able to demo TRIOS® 3 at the 3Shape booth.

D2000 dental lab scanner for ultimate productivity

The D2000 lab scanner, that scans two dental models at once, will be on display as well. The D2000, and select 3Shape scanner models, have been enhanced with new features and technology to increase productivity and reduce workflow time.

Some of the new features include: improved scanning workflows for smoother and more flexible scanning and optimized processing that significantly shortens waiting time between creating an order and starting the scan. New technologies will be unveiled first at the event.

OPENING DAY PRESS CONFERENCE

3Shape will hold a **press conference at 9.30 AM, Thursday, February 25 at its Midwinter Meeting 3Shape Booth #2043**. Products and solutions will be introduced.

Upcoming Dental System™ 2016

Midwinter and Lab Day visitors will get a sneak peek at the upcoming Dental System 2016 to be released later in the year. The new software has added many advanced tools while strengthening overall system stability. Dental System 2016 provides dental professionals with even more indications, tools and libraries as well as integrated and intuitive workflows with leading 3D printers and milling machines.

New Dental System™ 2016 features include:

- Accelerated lab scanners and new impression scanning technology
- Enhanced integration with TRIOS® and 3rd party intraoral scanners
- Fast and robust crown design engine
- Complete and seamless integration with milling machines and 3D printers

Additional new features will be revealed in Chicago.

Integrated solutions with Dental System™ for expanding lab business

Implant services

3Shape Implant Studio module is fully integrated with Dental System to enable labs to design and produce cost-efficient surgical guides, and offer prosthetic driven implant planning. Using the implant positions identified in Implant Studio, technicians can then design and produce all the prosthetic components, such as temporary crowns and customized abutments, using Dental System. Come by for a demo.

Orthodontic services made easy

3Shape Dental System also includes Splint Designer to enable labs to provide splints and simple orthodontic appliances.

3Shape lecture schedule at Lab Day 2016

The Hyatt Regency Chicago, 151 E Wacker DR, Chicago, IL 60601 - Columbus Ballroom IJ, Gold level

Thursday	Presenter	Lecture
