## The new 3Shape Dental System 2017 provides sturdy and efficient CAD/CAM workflows for labs

**Copenhagen, July 14, 2017** - 3Shape, a global leader in 3D scanners and dental CAD/CAM software solutions, releases Dental System™ 2017 – the latest version of its industry leading CAD software for dental labs.

3Shape's Dental System 2017 makes high quality CAD/CAM design and production faster, simpler and more dependable. The new Dental System introduces new treatment workflows and innovative technology that makes scanning even more efficient. 3Shape has enhanced the technician's user experience through significant improvements to the core design tools. And the software architecture has been strengthened for increased reliability and performance.

"We've been listening a lot to our users and set up ways to work very closely with them during the development of Dental System 2017," says Rune Fisker, VP of Dental Lab at 3Shape. "The increasing amount of work in labs, together with the growing importance of CAD/CAM to realize this makes stability a number one priority. Ensuring stability in Dental System became our main goal. On top of this, we have improved workflow speed and added new and attractive features such as Smile Design," concludes Rune Fisker.

### **3Shape Dental System 2017 highlights:**

- Simplified and highly efficient workflows for single-arch denture production
- Intelligent Adaptive Scanning rescans difficult areas and saves time.
- New Smile Design lets users quickly plan treatment and create highly esthetics designs
- Smile Composer with improved initial anatomy placement for more control
- Users can now go back to any step in the workflow while designing frame and anatomy cases

To get ongoing user feedback and ensure a highly reliable CAD/CAM software, 3Shape had its new Dental System 2017 tested thoroughly in more than 20 dental labs located in different countries before release.

"The new features in Dental System 2017 make it even easier to produce quality work with minimal effort," says Sevan Pulurian, CAD/CAM Specialist at Pacific Dental Lab in Los Angeles who has been working with the new software.

## About 3Shape

3Shape is changing dentistry together with dental professionals across the world by developing innovations that provide superior dental care for patients. Our portfolio of 3D scanners and CAD/CAM software solutions for the dental industry includes the multiple award-winning 3Shape TRIOS intraoral scanner, the game-changing 3Shape X1 4-in-1 CBCT scanner, and market-leading scanning and design software solutions for dental labs. Two graduate students founded 3Shape in the year 2000, and today the company's fast-growing team of employees in offices all over the globe is serving customers in over 100 countries. 3Shape's products and innovations continue to challenge traditional methods, enabling dental professionals to treat more people more effectively.
